## SUMMARY

A creative and detail-oriented **Frontend Developer** with strong proficiency in **React.js**, JavaScript, HTML, and CSS. Experienced in building responsive, scalable, and user-friendly web applications. Skilled in state management, consuming REST APIs, and collaborating in Git-based workflows. Seeking a frontend developer **internship or** position to build exceptional user interfaces.

## EDUCATION

<b>B.Tech in Information Technology</b> <i>Arya Institute of Engineering and Technology, Jaipur</i>	2022–2026 CGPA: 7.8 (Till 6th Sem)
<b>CBSE (Class XII)</b> <i>Intermediate</i>	2022
<b>CBSE (Class X)</b> <i>10th Grade</i>	2020

## PROJECTS

### React.js E-commerce Frontend (Furniture Website)

- Developed a pixel-perfect, responsive user interface using **React.js**, HTML, and modern CSS (e.g., Flexbox/Grid).
- Implemented core frontend features including dynamic product display, client-side search filtering, and a multi-step checkout process.
- Managed global application state for the user's shopping cart and wishlist using **React Context API** (or Redux).
- Integrated with a **Node.js/Express backend API** to fetch product data and handle user authentication.

### React Counter Web App

- Built a lightweight and responsive counter app using **React.js** with **Chakra UI** for modern UI components and styling.
- Implemented persistent state using **React Hooks** (`useState` and `useEffect`) with `localStorage` to retain count across sessions.
- Developed with **Vite** for fast build times and hot-reload, demonstrating component design, state management, and responsive layout.

## TECHNICAL SKILLS

**Frontend & Languages:** JavaScript (ES6+), React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery

**Tools & Platforms:** Git, GitHub, VSCode, Vercel, Render, Postman

**Familiar With:** Node.js, PHP, MySQL, MongoDB, C, Java
